SOFA FABRIC

Upholstery fabric series instruction

VANE.FUTURE divide to 4 series---VL series、 VR series、 VW series and ET series.

Four series are made of different materials. VL series are mainly made of linen , VR series fabrics include viscose, acrylic, rayon and other components. VW series mainly made up of wool and ET series mainly of chemical blended. Through the clever use of these different materials can enhance the texture of the whole series and achieve a light luxury style!

VL series

This series is mainly made of linen material, pure natural raw materials and with excellent permeability and crisp texture. You can feel warm in winter and cool in summer, and can absorb wet air truly. The fabric PH value is acidic, no irritation to the skin. It's in line with the requirements of environmental protection and health, also with excellent anti-mildew moth performance. The natural and concise artistic features give us a natural aesthetic feeling and simple artistic enjoyment. Wear-resistant characteristics will make the fabric beauty and ensure its practicality.

VR series

This series contains viscose, acrylic, rayon and other component. These yarns make the fabrics with excellent natural properties, including inherent fire retardant, excellent water resistance, stain and mildew resistance, and long service life, which make all types of furniture and interiors environmentally. Geometric shapes combined with lines create a subtle balance between the layers of the pattern and give us the impression of light luxury and fashion. The feature of different yarns are presented by organizing collocation and design rendering, producing a wonderful contrast, full of interest, making sofa fabrics full of unconstrained imagination and infinite possibility.

VW series-woven series

Elegant weaving effect, simple texture design. This series is a refinement and sublimation of the traditional woven texture pattern. Through the interweaving of yarns, it creates a three-dimensional woven effect on the fabric. It is simple but interesting, and have a very contemporary style. The design unite the color matching principle, build a fashionable avant-courier household atmosphere and improve the taste and atmosphere of the whole space.

ET series

This series is mainly made of imitation wool. The yarn has many excellent properties, such as smooth and cool, anti-static, anti-ultraviolet and good color fastness. Excellent resilience makes the fabric can quickly restore the original shape after repeated rubbing. And will not leave wrinkles, which is better than other fabrics. We can feel leisure in a fashionable house because of exquisite touch feeling and aesthetic feeling of administrative levels. External quality of a material with immanent temperament, reflect the honour of fashionable grade perfectly.
